SUMMARY

ML-focused CS undergraduate (2027) with production-grade projects in crop price forecasting (AgriPrice Sentinel), IPO risk analysis (NexIPO), and academic performance prediction (Ordinare). Proficient in Python, FastAPI, Next.js, and PostgreSQL. Seeking Data Science / SDE internship roles.

EDUCATION

IMS Engineering College
Bachelor of Technology (B.Tech) – Computer Science

Ghaziabad, Uttar Pradesh
2023 – 2027

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, Java, HTML, CSS
- **Frameworks & Libraries:** Next.js, FastAPI, Flask, Streamlit, pandas, NumPy, scikit-learn
- **Databases:** PostgreSQL
- **AI & APIs:** Anthropic Claude, Google Gemini, LLM APIs, REST APIs
- **Tools & Platforms:** Git, GitHub, Docker, Celery, Jupyter Notebook, Google Colab
- **CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, Operating Systems

PROJECTS

- AgriPrice Sentinel – Crop Price Forecasting Platform** | *Python, BiLSTM, FastAPI, Next.js, Redis* GitHub
- Developed a BiLSTM model with attention mechanism to forecast MSP and mandi crop prices, ingesting 5+ live data sources: IMD weather data, CBOT futures, e-NAM API feeds, and freight indices.
 - Achieved ~12% MAPE on 3-year mandi price forecasts; deployed REST API backend with Redis caching and Celery async task queue for real-time data processing.
 - Built a Next.js frontend dashboard and WhatsApp bot integration for farmer-facing price alerts, enabling direct last-mile delivery of forecasts.
- NexIPO – ML-Powered IPO Intelligence & Risk Analysis Platform** | *Python, BERT, LSTM, FastAPI, Next.js* GitHub
- Engineered a multi-factor IPO risk scorer with an explainability layer; trained a BERT+LSTM volatility model on 200+ IPO prospectuses with NLP-based red flag extraction.
 - Implemented scalable backend APIs with FastAPI and an independent ML microservice for explainable IPO risk scoring, served via interactive React/Next.js dashboards.
- Ordinare – AI-Powered Academic Planning & Performance Prediction** | *Python, scikit-learn, FastAPI, React* GitHub
- Built an AI-powered academic management system with real-time attendance analytics, automated GPA/percentage computation, and an ML-driven class-skip risk estimator with threshold alerts.
 - Trained classification models on historical exam paper patterns to predict student performance outcomes; achieved 85%+ accuracy on held-out test sets across 3 semesters of data.

ACHIEVEMENTS & CERTIFICATIONS

- **Phantasia 2026** – Top 10 finish (AI/ML Track) among 800+ teams (Online) & 70+ teams (Offline) | Bennett University, Greater Noida
- **Manthan'25** – Participant | COER University, Roorkee, 2025
- **LeetCode** – Solved 100+ problems across Easy, Medium, and Hard difficulty levels
- **AWS Cloud Practitioner Essentials** – Amazon Web Services, 2026
- **Deloitte Australia Technology Job Simulation** – Forage, 2025
